

Physician Information Regarding the Department of Health & Senior Services Medicinal Marijuana Program

The Department of Health and Senior Services (DHSS), Medicinal Marijuana Program (MMP) under authority of New Jersey Statute Annotated (N.J.S.A.) 24:6I-1 et seq. and New Jersey Administrative Code (N.J.A.C.) 64:8-1 et seq. is responsible for the administration and implementation of activities related to the New Jersey Compassionate Use Medical Marijuana Act.

In furtherance of the program, the MMP is publishing the Physician Registry list. This list will be available on 04/16/2012 and will identify physicians currently participating in the program. The Physician Registry list will be posted on the DHSS, MMP website at: www.state.nj.us/health/medicalmarijuana/

The purpose of the Physician Registry list is to provide attending physicians and their patients, a list of doctors currently registered and approved to participate in the MMP. This list will provide current contact information and can be used by attending physicians to assist in directing their patients to physicians registered with the program. Patients can also use the information on the list to contact a participating physician in order to establish the necessary physician patient relationship.

Physicians not currently registered, but interested in participating in the MMP, may register at: <https://njmmp.nj.gov/njmmp/>. Once registered, physicians will be able to initiate the registration process for qualified patients with whom they have a bona fide physician patient relationship. For all program eligibility requirements please access the MMP website at: www.state.nj.us/health/medicalmarijuana/.

The Patient Registry is not active at this time.

Questions regarding the Physician Registry list may be addressed to the MMP at 609-292-0424 or by email at: www.state.nj.us/health/medicalmarijuana/.
